[Drug Money, Police Incentives, and Crime: Evidence from Civil Asset Forfeiture](#) (sole author)
[under review as of 2/2026]

Abstract: Do drug-money seizures influence police behavior? In this paper, I exploit variation from the 2015 suspension of a federal asset forfeiture program that sent monetary kickbacks to local law enforcement for policing drug crimes. Using a difference-in-differences design, I find that participating local agencies cut drug-related arrests in response to the suspension of adoptions payments. The decline scales with pre-suspension participation and is strongest for possession offenses and municipal police departments. I also find suggestive evidence that violent crime increased after the suspension, implying forfeiture revenue can expand enforcement effort in ways that may be socially beneficial.

Research Experience

Research Assistant for Professors [Seth Sanders](#) and [Evan Riehl](#), Cornell University, 2025-2026
